

# Vejledning for montering og vedligehold

## Legehus EL16-1929

Bredde 193 x Dybde 286 cm  
Vægtykkelse 16 mm

### ADVARSLER:

Ikke egnet for børn under 3 år. Risiko for trykskade.  
Må kun anvendes under opsyn af en voksen. Risiko for fald.  
Kun til udendørs privat brug.  
Må ikke anvendes i nærheden af åben ild.  
Produktet leveres usamlet. Samling skal foretages af en voksen.  
Beregnet til børn mellem 3 og 14 år (max. 50 kg/person).

Produceret af:  
PALMAKO AS  
Näituse 25, Tartu  
50409 Estonia

Produktet overholder standarden EN  
71 og direktiv 2009/48/EF.

### Opmærksomhed!

- Det er ikke tilladt at klatre på rækværk og tag på det monterede produkt.
- Dele af træ kan indeholde splinter eller skarpe ender og kanter.
- Sovearealet må ikke bruges af flere end 2 børn samtidigt!
- Der medfølger intet tagdækningsmateriale. Inden du begynder at anvende produktet, skal du anskaffe passende tagdækningsmateriale (tagpap i ruller eller fliser) og montere det i henhold til producentens anvisninger. Det anbefales ikke at efterlade produktet uden tag i regnvejr, da garantien dermed bortfalder!
- Produktet leveres umalet!

## 1 Generelt

**Kære kunde,**

Tak fordi du valgte vores produkt!

**Venligst læs hele monteringsvejledning igennem før du går i gang** for at undgå unødvendig tidsspilde og problemer!

### Anbefalinger

- Opbevar pakken med produktet tørt, beskyttet mod vejr og vind og ikke direkte på jordoverfladen indtil monteringen er afsluttet. Pakken må ej heller være i nærheden af en varmekilde.
- Saml produktet på en jævn overflade mindst 2 m fra bygning eller anden hindring som f.eks. hegn, garage, hus, overhængende grene fra træer, tørresnore og elektriske ledninger.
- Ved placeringen af produktet vær opmærksom på, at produktet ikke kommer til at stå i ekstreme vejrforhold (stærk vind, meget sne i.lign.), i så fald skal produktet fæstnes med passende ankere til grunden.
- Eftersom bjælkelaget er i konstant kontakt med jordoverfladen, skal det behandles med særlig træbeskyttelse. Hør med en specialist om hvilke typer maling, der er passende til ubehandlet nåletræ og følg producentens vejledning.

### Garanti

Produktet er fremstillet af højkvalitativ grantræ og leveres i ubehandlet stand. Hvis der på trods af vores grundig kvalitetskontrol skulle være klager eller mangler ved produktet, skal disse indgives til sælgeren sammen med udfyldt kontrolskema og indkøbskvittering.

**OBS: Venligst opbevar vedlagte dokumentation til produktet! Produktets kontrolnummer fremgår af kontrolskemaet. Klager kan kun indgives hvis I oplyser kontrolnummeret til sælgeren.**

Garantien omfatter ikke følgende:

- Ujævnheder og afvigelser grundet træets naturlige egenskaber
- Detaljer som allerede er behandlet med træbeskyttelse
- Detaljer som indeholder hele knaster der ikke påvirker produktets stabilitet
- Afvigelser i træets farvenuancer som ikke påvirker træets levetid
- Detaljer som indeholder små sprækker opstået ved tørning der ikke er gennemgående og som ikke påvirker produktets konstruktion
- Trædetaljer med skævhed, der stadig kan monteres
- Tag- og gulvbrædder, der indeholder uhøvlede pletter, farveafvigelser eller andre pletter i ikke synlige steder
- Klager der opstået pga. ukyndig montering af produktet eller ved placeringen af produktet på et ukorrekt udført fundament
- Klager, der er opstået pga. egne tiltag eller ændringer ved produktet, såsom skævhed af trædetaljer, døre og vinduer pga. ukyndig behandling af træet; stormlisternes for stram montering; dørkarme fastmonteret i vægdetaljer o.lign.

**Garantien udøves ved at ombytte den fejlbehæftede element med en ny. Alle andre krav tilgodeses ikke!**

### Produktets maling og vedligeholdelse

Træ er et naturmateriale, der bevæger sig afhængigt af vejrforhold. Små og store sprækker, farveafvigelse og ændringer, samt ændret træstruktur er ikke fejl, men træets egenskaber som naturmateriale.

Ubehandlet træ (undtagen fundamentalsprosser) ændres efterhånden til gråligt, kan endda blive blåligt og muggent. For at beskytte dit produkt og dens trædele bedst, skal du så hurtigt som muligt behandle træet med træbeskyttelse.

**OBS!**            **Produktet leveres uforarbejdet. For at reducere brandfaren bør du anvende maling eller træbeskyttelse, som reducerer risikoen for, at en brand kan sprede sig! Brug vandbaseret maling og træbeskyttelse og undgå produkter, der er baseret på opløsningsmidler!**

**Rådfør dig med en specialist i maling af uforarbejdet nåletræ og følg producentens anvisninger.**

**Det er ikke tilladt at behandle produktet med lak eller maling, der har en flammespredningsrate på overfladen, som er højere end 20mm/s.**

Efter monteringen af produktet anbefaler vi brugen af en passende maling for at beskytte ydersiden mod vejr, vind og UV-stråling.

Brug højkvalitative redskaber og maling under malingsarbejdet, følg instruktioner og anbefalinger fra malingsproducenten. Mal aldrig i direkte sollys eller i regnvejr. Søg tips og råd hos din malingsforhandler og følg deres instruktioner.

- Lange perioder med tørt vejr kan få træet til at trække sig sammen, og de steder, hvor der er fastgjort skruer eller bolte, kan miste deres styrke. Kontroller regelmæssigt og stram skruer/bolte efter behov (mindst hver sjette måned)! Ellers kan produktet være farligt at anvende.
- Underlagets egnethed, korrosion af udstyr og råd i træværk bør tjekkes mindst en gang årligt. Bevægelige dele skal smøres og slidte og/eller defekte dele udskiftes med dele, som er leveret af producenten.
- Vær især nøje med kontrollen af rækværk og dørindføjning.
- Det anbefales at gennemgå produktet grundigt en gang årligt. Regelmæssig maling af produktet vil forlænge dets levetid betragteligt.
- Du bør også kontrollere taget med henblik på at afsløre lækager så tidligt som muligt. Tæt lækager med det samme, når du finder dem, for at undgå, at regnvand beskadiger taget eller andre trædele i produktet.

**OBS!**            **Brug kun identiske dele til reparation af produktet. Specifikationen for komponenterne findes i den dokumentation, der medfølger sættet.**

**Pøj-pøj med monteringen af Dit nye produkt! Vi håber, I får glæde af det mange år frem i tiden!**

## 2 Vejledning for montering

### Redskaber og forberedelse af alle elementer

For monteringen har du brug for følgende redskaber og værktøj:

en hjælper

stige

hammer

vatterpass

skruetrækker

sav

kniv

målebånd

tang

boremaskine

fil

skiftenøgle

blyant

**BEMÆRK:** For at undgå skader fra splinter anbefaler vi at anvende passende beskytteshandsker under monteringen. Vi anbefaler at anvende beskyttelsesbriller under monteringen for at beskytte dine øjne mod savspåner.

For at undgå sprækker i træet bør du forbore, inden du skruer skrue i.

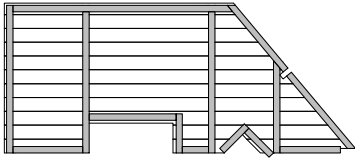

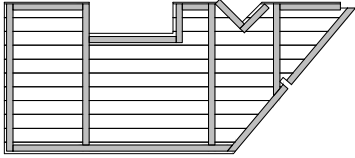

Alle udstående skrue og skarpe kanter skal slibes ned umiddelbart efter monteringen for at undgå mulige skader.

Gør grunden plan og monter bjælkelaget, som det fremgår af tegningen nedenfor:
